

Sound Catch™ Salmon

Local Fish from Local Fishermen

In the Pacific Northwest, we are lucky to live with a bounty of fresh seafood, meats, vegetables, and fruits, all carefully tended and harvested just minutes from our stores and restaurants. So when you choose your seafood, make sure to offer wild, locally caught Sound Catch™ salmon to your customers. They will appreciate the opportunity to share in the abundance of our local waters, and will recognize the quality only wild Washington salmon can offer.

Make Local Fish Your First Choice

Sound Catch salmon is caught in the marine waters of Western Washington, so it can be quickly processed and delivered to the area's grocery stores and restaurants. As with any perishable food, local harvest allows for a fresher product.

Sound Catch is always top quality wild salmon selected for the most discriminating buyers. All of our fish are handled carefully and immediately chilled on board. They can also be princess dressed at the buyer's request.

Like local farmers, fishermen run small businesses that support the local economy and provide high quality salmon at fair values for all. By supporting local fishermen, you ensure the continued availability of this precious local product.

Salmon in Washington are carefully managed to ensure their sustainability. We catch only salmon that are allowed for harvest, ensuring that we will have a healthy resource for the future.
